

Work Experience

Senior Backend Engineer	PT Infomedia Nusantara Bandung, Indonesia	July 2026- Present
- Designed and developed scalable microservices using Golang, serving high-volume customer service and business applications. - Built event-driven architecture with Apache Kafka for asynchronous communication, reliable data streaming, and decoupled service integration. - Designed and optimized data models and queries on MongoDB and PostgreSQL, improving read/write performance and data consistency. - Developed and maintained RESTful APIs and service-to-service integrations across multiple internal systems. - Collaborated with product, QA, and DevOps teams to deliver features, resolve production incidents, and maintain system reliability.		
Coding Teacher	Artima Edu (artimaedu.web.id) Remote, Indonesia	Mei 2026- Present
- Taught coding classes for students aged 4-17, adapting teaching methods and difficulty to each age group and skill level. - Designed curriculum, learning modules, and teaching materials for a coding-for-kids program, from beginner to advanced levels. - Created and managed online classes, including scheduling, student enrollment, and class progress tracking, using the in-house LMS. - Delivered engaging, project-based lessons that introduce logic, problem-solving, and programming fundamentals to young learners. - Designed and issued completion certificates to recognize student achievement. - Communicated with parents on student progress and learning outcomes.		
Co- Founder	Artima Edu (artimaedu.web.id) Remote, Indonesia	Mei 2026- Present
- Developed and maintained backend services for an education platform, supporting learning management, student, and academic features. - Designed and implemented RESTful APIs for web and mobile clients, with a focus on performance and reliability. - Designed database schemas and optimized queries to support growing user and data volumes. - Integrated third-party services such as payment gateways, notifications, and other external APIs. - Implemented authentication, authorization, and role-based access control for students, teachers, and administrators. - Built and published an educational games Android app on Google Play Store, featuring 16+ interactive games for children aged 3-12 across math, logic, language, and science. - Developed the web storefront for the games platform (apps.artimaedu.web.id/games), including game catalog, category and age filtering, user registration and login, and parental email consent for minors. - Implemented an in-app coin economy with game purchases, bundle packages (e.g., Infinity Pass), and instant coin top-up via QRIS payment. - Developed a web-based Learning Management System (LMS) for virtual classes, with dedicated portals for students, teachers, and parents. - Implemented authentication, role-based access control, and separate account types for LMS students and games players. - Designed backend services, REST APIs, and database schemas to support both the games platform and the LMS.		
Senior Backend Engineer	Edot.id(vendor ProIntegrate) Remote, Indonesia	August 2025 - Mei 2026
- implement a new services for Knowledge Base System, and implement AI Product - implement grpc call and http call proto on some engine. - maintain and develop new features on system knowledge domain service, fico system, etc - using golang, Mongoddb, redis, RabbitMQ and gRPC, etc		
Senior Software Engineer	Amartha Mikrofintek(amartha.com) Remote, Indonesia	Nov 2022 - July 2025

- implemented micro services that are handled to disburse the branch on a national scale.
- implemented kafka on newly built micro services to handle event records.
- contribute on fixing bugs and make RCA documents and contribute.
- using golang, postgresql, redis, kafka and gRPC.

Software Engineer

Moladin(moladin.com)

Remote, Indonesia

April 2022 - Nov 2022

Moladin is Indonesia's fastest-growing Series B-funded (\$89mio raised) tech-powered online used car automotive.

- implemented micro services that handled the calculation on the newly loan system.
- implemented kafka on newly built micro services to handle event records.
- made a new library to calculate things on the newly loan system.
- using nodejs, express js, postgresql, redis, and kafka

Software Engineer

Delos, Inc(delos.co.id) June 2021 - March 2022

Remote, Indonesia

- maintain and develop new features on the services to handle the customer domain and super user domain.
- implement mongoDB on new features on super user and fixing redis cache.
- using spring boot, postgresql, redis, kafka and golang.

Software Engineer

PerluPOS(perlupos.co.id)

Bandung, Indonesia

July 2020 - Jan 2021

- implement a new services for ticketing system and dashboard real time
- implement php library to handle client http.
- maintain and develop new features on super user domain services.

Software Engineer

KreditPlus(kreditplus.com)

Bandung, Indonesia

Jan 2019 - March 2020

- remotely from bandung city lead 6 engineers, to develop new features and new services.
- implement micro services decision engine loan approval.
- implement micro services wrapper to face recognition engine
- implement gateway services to merchants to request loans on listing.
- using golang, gin-go, echo, postgresql, mssql, kafka as the main stack.

Software Engineer

Masskredit(masskredit.co.id)

Bandung, Indonesia

March 2018 - Jan 2019

- maintain and develop new features on a monolithic service handle customer and super user domain service.
- implement new services for version 2.0 and implementing on micro services on stack postgresql, spring boot, redis, docker
- maintain and develop new features on new services to handle accounting and on laravel stack

Education and Certifications

- **Associate Degree. Computer Software Engineering**, Universitas Padjadjaran, Indonesia.

2011–2015

Technologies and Languages

- Languages: Go, Java, Rust, NodeJs (Javascript), PHP
- Technologies: Gin-go, echo Http Framework, Spring Boot, Actix Web, ExpressJS, Laravel, MySQL, Postgres, MongoDB, Kafka, Docker
- Other: Data structures and algorithms
